

Contract for Moon Mountain

We propose to make an easier method to look up the price of stones for Moon Mountain Gems with the following understandings:

What we propose to make and/or do:

We will provide a database and a user interface to search through the inventory of said database. The goal is to fix the problem of identifying inventory in a manner to provide an appropriate price.

TO DELIVER: An inventory database with UI to make pricing information more accessible.

What we need from Company to accomplish this task

Company is responsible for purchasing web server, equipment needed for 3d printing up to but will not exceed \$1000

What will happen when these guidelines change

How we accomplish the task will vary on availability of software, understanding of complex topics, and timeframe.

What we expect in compensation

A fair assessment of deliverable and student performance during the project.

What limitations we have

We are a student team and this is a student project. This project comes with no particular guarantees, including in particular warranty or suitability for a particular purpose, or long-term support.

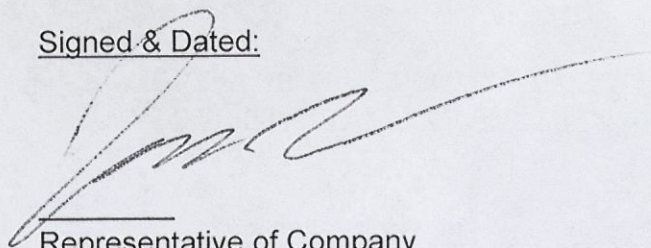

Ownership and Fair Use of Intellectual Property

The Intellectual Property created during this project (for example software, business

processes, and artwork) is granted permanently for use and extension for the business owner, but is ultimately owned by the respective creator(s) who are not limited to reuse or extend this work elsewhere. By the end of this project, a code repository with the software will be made available to the client.

The software may also be used as future demonstrations at Colorado Mesa University.
